FOREWORD

Directorate of Economics & Statistics, Ministry of Agriculture and Farmers Welfare has been periodically bringing out "Farm Harvest Prices of Principal Crops in India". The importance of this publication lies in the fact that data on farm gate prices facilitate fine-tuning of policies aimed to promote farmers' welfare. This issue contains data on farm harvest prices of principal crops for the year 2014-15. The data are based on the returns received from the State Governments and Union Territories. A note on the methodology for collection of data on farm harvest prices and the particulars of harvesting seasons of principal crops in the major growing States has been provided at the end of the statistical tables. The data presented in this publication are available on the website: <http://eands.dacnet.nic.in/> of the Ministry of Agriculture and Farmers Welfare.

The detailed work has been carried out by the Price and Market Division, Directorate of Economics & Statistics, Ministry of Agriculture & Farmers Welfare under the overall guidance and supervision of Shri B.L. Meena, Additional Economic Adviser. We are grateful to the States who have given us timely information for inclusion in this volume and solicit the continued cooperation of all States in the future.

It is hoped that the publication would be useful for a wide range of researchers and policy makers. We welcome suggestions for improvement of this publication.

S.K. MUKHERJEE
(Sr. Economic & Statistical Adviser)

PREFACE

The meticulous collection and compilation of Agricultural Wholesale and Retail Prices, Wholesale Price Index, Consumer Price Indices and select World Prices serves as an important source of research.

Data on Wholesale Price Index are obtained from the website of the Office of the Economic Adviser, Department of Industrial Policy and Promotion. Consumer Price Index Numbers for Agricultural Labourers are provided by the Labour Bureau under the Ministry of Labour and Employment.

The task of collection, compilation and presentation of prices data for this publication is executed by the staff of Price and Market Division under the guidance of Shri B.L.Meena, Additional Economic Adviser and Shri Rakesh Agrawal, Deputy Director. Efforts taken by every staff member in the Division are praiseworthy and our heartfelt thanks go to the following:

1. Smt. Swathi S. Senan, Economic Officer
2. Smt. Jaishree Kumar, Senior Statistical Officer
3. Smt. Sudesh Harish, Technical Assistant
4. Smt. Sushma Johri, Technical Assistant
5. Smt. Anita Bhatnagar, Technical Clerk
6. Smt. Jemma Bara, DEO (Grade-B)
7. Smt. Suman Devi, Junior Statistical Officer
8. Shri Udai Pal, DEO (Grade-C)
9. Shri Hemendra Kumar Meena, Junior Statistical Officer

Sincere efforts have been made to bring out this publication and suggestions for improvement are most welcome.

(Pushpa Thottan)

APPENDICES

APPENDIX-I

METHODOLOGY FOR COLLECTION OF FARM HARVEST PRICES

1. Farm Harvest prices of a commodity as reported in this publication is defined as the average wholesale price, at which the commodity is disposed of by the producer to the trader at the village site during the specified marketing period after the commencement of harvest.
2. The information on Farm Harvest Prices is provided by State Governments and the following procedure is followed by them for systematising the collection and compilation of these statistics:-
 - a) A certain number of representative villages are selected in each district at the rate of one, two or three villages from each Tehsil, depending upon the extent to which the crop is grown in the Tehsil. The total number of villages to be selected in each district should, however, not be less than ten.
 - b) In each selected village, the price at which the commodity is sold by the producer is recorded in the specified form (p.80), by the price reporter on every Friday during the peak period of marketing after the commencement of the harvesting season. If no sales take place on that Friday, the price at which the commodity was sold last during the week is recorded instead.
 - c) In cases, where village site transactions do not take place, the price reported relate to what the farmer receives for his produce, and is obtained by subtracting transport and other marketing charges from the wholesale prices quoted at the mandi where produce is disposed of.
 - d) The price recorded is the wholesale price of the specified variety of the commodity and is expressed in terms of Rupees and paise per quintal (net weight) exclusive of gunny bags / container.
3. The existence of different varieties and qualities of commodities with a wide variation in prices makes the task of giving a single harvest price for a commodity for the State as a whole difficult. In each district, however, it may be possible to determine a particular variety which is grown to the largest extent, and that variety is specified for the purpose of noting the farm harvest prices. In some cases, it may be necessary to give the farm harvest prices of two varieties separately if the difference in price is large, as for instance, in the case of prices of Bt Cotton and Desi cotton.
4. It is also necessary to fix the reference period of harvest and the subsequent peak period of marketing for each crop, as these tend to vary widely depending upon the variety of the crop and the nature of cultivation. In some cases, it is even difficult to define strictly the harvesting period, as for instance, in the case of cotton where there are more than four pickings in a year.

These periods, however, are fixed in respect of each-crop and each State by the State Governments having due regard to the local conditions. Usually, in case of most commodities, six to eight weeks during the peak period of marketing after the commencement of the harvest season is taken to be the period during which farmers are generally expected to dispose of their produce.

5. Data on farm harvest prices are viewed as an integral part of agricultural statistics. They need to be collected through the same agency employed for the collection of statistics of area and yield. The Supervisors, Kanungos, Revenue Inspectors or the equivalent officials, who are generally employed by the state government for the collection of statistics of area and yield are also entrusted with the task of collecting these statistics. However, in view of the wide divergences in the revenue machinery of different States, the choice of the reporting agency is left to the decision of the State Government. The price reporters are required to visit the selected villages on the appointed dates, enquire personally the prices at which the commodity has been sold by the farmer and record them in the specified form.

6. The method of arriving at the average price of a commodity for the State as a whole is the method of weighted average, with the district production figures for the concerned year as weights. However, the average price for the district for each week may be obtained as a simple arithmetic average of the Tehsil prices which in turn, are the simple arithmetic average of village prices. The average price for the season is the simple arithmetic average of the district prices for each commodity. The computation of the district average price is done at the district headquarters while the prices for the State as a whole is worked out at State headquarters.

7. The farm harvest prices are required to be collected in respect of all the important crops and, in any case, they are required to be submitted for all the crops which come under the purview of advance estimation. As the final estimate of every crop is published at least one month after the completion of harvesting, it may be feasible to get the farm harvest prices ready by the time of the final estimate.
