Message

Agriculture sector continues to play a critical role in economic growth and development of the country. Developments in the sector are of interest to a wide spectrum of people across the world, including policy makers, researchers, academicians, agri-business community, International Organizations, etc. The 'Farm Harvest Prices of Principal Crops in India' published annually by the Agricultural Marketing Division of the Department of Agriculture and Farmers Welfare provides a comprehensive set of information on the farm gate prices across states and over time. Farm gate price data is crucial to policymakers to assess the profitability of farming, understand price fluctuations, and identify areas where interventions may be needed to support farmers and ensure food security.

The Department of Agriculture and Farmers Welfare brings out the publication "Farm Harvest Prices of Principal Crops in India 2023-24" incorporating updated information on state-wise farm gate prices based on the information received from the State Governments and Union Territories. This publication is being released on our website: <https://desagri.gov.in>.

I extend my appreciation to Smt. Maninder Kaur Dwivedi, Additional Secretary, Shri Navin Kumar Vidyarthi, Adviser, Shri Kaviarasan K., Additional Economic Adviser and all the officials of Prices & Market Unit of Agricultural Marketing Division for their commendable efforts in expeditiously bringing out this volume.

This publication will prove beneficial to research institutions, academics, policymakers, and all other relevant stakeholders. I eagerly anticipate feedback for further enhancements.

PREFACE

“Farm Harvest Prices of Principal Crops in India” is a publication which is being brought out every year by the Department of Agriculture & Farmers Welfare. The present volume contains information on Farm Harvest Prices of 36 principal agricultural crops for the year 2023-24, which have been compiled on the basis of information shared by all States and Union Territories. The agricultural crops covered are Paddy, Rice, Jowar, Bajra, Maize, Ragi, Wheat, Barley, Gram, Arhar, Sugar Raw (Gur), Sugarcane, Potato, Tobacco, Groundnut, Rapeseed, Sesamum, Linseed, Castor seed, Nigerseed, Soyabean, Sunflower, Cotton, Jute, Sunnhemp, Mesta, Pepper, Ginger, Chilli, Turmeric, Arecanut, Banana, Tapioca, Coconut, Toria and Cashewnut.

The task of compilation and presentation of farm harvest prices data for this publication has been carried out by the staff of Price and Market Unit, Agricultural Marketing Division, under the supervision of Shri Kaviarasan K., Additional Economic Adviser and Shri Kunal Kapoor, Deputy Director. The staff members associated with the preparation of this publication are:

1. Shri Sharad Anand, Economic Officer (MI)
2. Shri. Parvinder Singh, Senior Statistical Officer
3. Shri. Arbind Singh Rawal, Junior Statistical Officer
4. Shri. Anurag Bhullar, Junior Statistical Officer
5. Shri. Mukesh Kumar Meena, Market Intelligence Inspector (Eco.)
6. Shri Himanshu Gupta, Technical Clerk (Eco.)
7. Shri Akshay, Technical Clerk (Eco.)

Sincere efforts have been put in to bring out this publication. Suggestions for improvement are most welcome and may be sent to des-wpt@nic.in.

(Navin Kumar Vidyarthi)

FARM HARVEST PRICES

Introduction

The Farm Harvest Price of a commodity, as reported in this publication, is defined as the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified marketing period after the commencement of harvest.

Methodology

The information on Farm Harvest Prices is provided by the State Governments and the following procedure is followed by them for systematizing the collection and compilation of these statistics:-

- a) A certain number of representative villages are selected in each district at the rate of one, two or three villages from each Tehsil, depending upon the extent to which the crop is grown in the Tehsil. The total number of villages to be selected in each district should, however, not be less than ten.
 - b) In each selected village, the price at which the commodity is sold by the producer is recorded in the specified form (Appendix-I), by the price reporter on every Friday during the peak period of marketing after the commencement of the harvesting season. If no sales take place on that Friday, the price at which the commodity was sold last during the week is recorded instead.
 - c) In cases where village site transactions do not take place, the price reported relates to what the farmer receives for his produce, and is obtained by subtracting transport and other marketing charges from the wholesale prices quoted at the mandi where the produce is disposed of.
 - d) The price recorded is the wholesale price of the specified variety of the commodity and is expressed in terms of Rupees and paise per quintal (net weight) exclusive of gunny bags / containers.
3. The existence of different varieties and qualities of commodities with a wide variation in prices makes the task of giving a single harvest price for a commodity for the State as a whole difficult. In each district, however, it may be possible to determine a particular variety which is grown to the largest extent, and that variety is specified for the purpose of noting the farm harvest prices. In some cases, it may be necessary to give the farm harvest prices of two varieties separately if the difference in price is large, as for instance, in the case of prices of Bt Cotton and Desi cotton.
4. It is also necessary to fix the reference period of harvest and the subsequent peak period of marketing for each crop, as these tend to vary widely depending upon the variety of the crop and the nature of cultivation. In some cases, it is even difficult to define strictly the harvesting period, as for instance, in the case of cotton where there are more than four pickings in a year.

These periods, however, are fixed in respect of each crop and each State, by the State Governments, having due regard to the local conditions. Usually, in case of most commodities, six to eight weeks during the peak period of marketing, after the commencement of the harvest season, is taken to be the period during which farmers are generally expected to dispose of their produce.

5. Data on farm harvest prices are viewed as an integral part of agricultural statistics. They need to be collected through the same agency employed for the collection of statistics of area and yield. The Supervisors, Kanungos, Revenue Inspectors or the equivalent officials, who are generally employed by the state government for the collection of statistics of area and yield, are also entrusted with the task of collecting these statistics. However, in view of the wide divergences in the revenue machinery of different States, the choice of the reporting agency is left to the decision of the State Government. The price reporters are required to visit the selected villages on the appointed dates, enquire personally the prices at which the commodity has been sold by the farmer and record them in the specified form.

6. The method of arriving at the average price of a commodity for the State as a whole is the method of weighted average, with the district production figures for the concerned year as weights. However, the average price for the district for each week may be obtained as a simple arithmetic average of the Tehsil prices which, in turn, are the simple arithmetic average of village prices. The average price of a commodity for the season is the simple arithmetic mean of the district price for all the weeks of the season. The computation of the district average price is done at the district headquarters while the prices for the State as a whole are worked out at State headquarters.

7. The farm harvest prices are required to be collected in respect of all the important crops and, in any case, they are required to be submitted for all the crops which come under the purview of advance estimation. As the final estimate of every crop is published at least one month after the completion of harvesting, it may be feasible to get the farm harvest prices ready by the time of the final estimate.

कृषि फसलों के मूल्य

प्रस्तावना

इस प्रकाशन में दी गई जानकारी के अनुसार किसी जिन्स की कृषि फसल मूल्य को औसत थोक मूल्य, जिस पर कटाई प्रारंभ होने के पश्चात निर्धारित विपणन अवधि के दौरान ग्राम स्थल पर उत्पादक द्वारा व्यापारी को अपनी उपज की बिक्री की जाती है, के रूप में परिभाषित किया गया है।

पद्धति

राज्य सरकारों द्वारा कृषि फसल की कीमतों की जानकारी प्रदान की जाती है और इन आंकड़ों के संग्रह और संकलन को व्यवस्थित करने के लिए उनके द्वारा निम्नलिखित प्रक्रिया का पालन किया जाता है :-

(क) प्रत्येक तहसील से एक, दो या तीन गांवों की दर से प्रत्येक जिले में एक निश्चित संख्या में प्रतिनिधि गांवों का चयन किया जाता है, जो इस बात पर निर्भर करता है कि तहसील में फसल किस हद तक उगाई जाती है। तथापि, प्रत्येक जिले में चुने जाने वाले गांवों की कुल संख्या दस से कम नहीं होनी चाहिए।

(ख) प्रत्येक चयनित गांव में कटाई के मौसम की शुरुआत के बाद विपणन की चरम अवधि के दौरान जिस कीमत पर उत्पादक द्वारा उत्पाद बेचा जाता है, उसे मूल्य रिपोर्टर द्वारा हर शुक्रवार को निर्दिष्ट रूप (परिशिष्ट-1) में दर्ज किया जाता है। यदि उस शुक्रवार को कोई बिक्री नहीं होती है, तो उसके बजाए पिछले सप्ताह के दौरान जिस कीमत पर कृषि जिन्स बेची गई थी उसे दर्ज किया जाता है।

(ग) ऐसे मामलों में, जहां ग्राम स्थल पर लेन-देन नहीं होता है, रिपोर्ट की गई कीमत किसान को उसकी उपज के लिए प्राप्त होने वाली राशि से संबंधित होती है, और इसका आंकलन मंडी, जहां उपज की बिक्री की जाती है, में थोक मूल्यों से परिवहन और अन्य विपणन शुल्क घटाकर की जाती है।

(घ) दर्ज की गई कीमत जिन्स की निर्दिष्ट किस्म का थोक मूल्य है और इसे बोरी/कंटेनर को छोड़कर रूपए और पैसे प्रति क्विंटल (कुल वजन) के रूप में प्रस्तुत किया जाता है।

3. कीमतों में व्यापक भिन्नता के साथ जिन्सों की विभिन्न किस्मों और गुणों के होने से राज्य के लिए इन जिन्सों के लिए एक ही फसल मूल्य निर्धारित करने का कार्य कठिन हो जाता है। हालांकि, प्रत्येक जिले में, एक विशेष किस्म को निर्धारित करना संभव हो सकता है जो कि सबसे अधिक उगाई जाती है, और उस किस्म को कृषि फसल मूल्य को नोट करने के उद्देश्य से चिह्नित किया जाता है। कुछ मामलों में, यदि कीमत में अंतर बड़ा है तो दो किस्मों की फसल की कीमतों को अलग-अलग देना आवश्यक हो सकता है जैसे कि बीटी कपास और देसी कपास की कीमतों के मामले में।

4. प्रत्येक फसल के लिए फसल की संदर्भ अवधि और उसके बाद विपणन की चरम अवधि को निर्धारित करना भी आवश्यक है, क्योंकि ये फसल की विविधता और खेती की प्रकृति के आधार पर व्यापक रूप से भिन्न होते हैं। कुछ मामलों में, कटाई की अवधि को पूर्णतः निर्धारित करना और भी मुश्किल है, उदाहरण के लिए कपास के मामले में जहां एक वर्ष में चार से अधिक बार कपास की फसल प्राप्त की जाती है।

हालाँकि, राज्य सरकारों द्वारा स्थानीय परिस्थितियों को ध्यान में रखते हुए ये अवधियां प्रत्येक फसल और प्रत्येक राज्य के संबंध में निर्धारित की जाती हैं। आमतौर पर, अधिकांश वस्तुओं के मामले में, फसल के मौसम के शुरू होने के बाद विपणन की चरम अवधि के दौरान छह से आठ सप्ताह की अवधि को उस अवधि के रूप में लिया जाता है, जिसके दौरान किसानों से आम तौर पर अपनी उपज की बिक्री करने की उम्मीद की जाती है।

5. कृषि उपज की कीमतों के आंकड़ों को कृषि आंकड़ों के एक अभिन्न अंग के रूप में देखा जाता है। उन्हें क्षेत्र और उपज के आंकड़ों के संग्रह के लिए नियोजित उसी एजेंसी के माध्यम से एकत्र करने की आवश्यकता है। पर्यवेक्षक, कानूनगो, राजस्व निरीक्षक या समकक्ष अधिकारी, जिन्हें सामान्यतः राज्य सरकार द्वारा क्षेत्र और उपज के आंकड़ों के संग्रह के लिए नियोजित किया जाता है, को इन आंकड़ों को भी एकत्र करने का कार्य सौंपा जाता है। हालाँकि, विभिन्न राज्यों के राजस्व तंत्र में व्यापक अंतर को देखते हुए, रिपोर्टिंग एजेंसी का चयन राज्य सरकार के निर्णय पर छोड़ दिया गया है। मूल्य रिपोर्टों को नियत तारीखों पर चयनित गांवों का दौरा करने, व्यक्तिगत रूप से उन कीमतों जिन पर किसान द्वारा उपज बेची गई है की पूछताछ करने की आवश्यकता है, और उन्हें निर्दिष्ट रूप में रिकॉर्ड किया जाता है।

6. संपूर्ण राज्य के लिए किसी जिन्स के औसत मूल्य पर पहुंचने की पद्धति भारत औसत पद्धति है, जिसमें संबंधित वर्ष के लिए जिला उत्पादन के आंकड़ें वजन में दर्ज किए जाते हैं। हालाँकि, प्रत्येक सप्ताह में जिले के औसत मूल्य तहसील कीमतों के एक साधारण गणितीय औसत के रूप में प्राप्त किया जा सकता है, जो कि गांव की कीमतों का साधारण अंकगणितीय औसत है। किसी मौसम के दौरान औसत मूल्य, जिले से प्राप्त सभी साप्ताहिक मूल्यों का साधारण अंकगणितीय औसत है। जिले की औसत मूल्यों की गणना जिला मुख्यालय पर की जाती है जबकि संपूर्ण राज्य के लिए कीमतों की गणना राज्य मुख्यालय में की जाती है।

7. सभी महत्वपूर्ण फसलों के संबंध में कृषि फसलों की कीमतों को एकत्र करना आवश्यक है और किसी भी मामले में, उन्हें उन सभी फसलों के लिए जमा करना आवश्यक है जो अग्रिम अनुमान के दायरे में आती हैं। चूंकि प्रत्येक फसल का अंतिम अनुमान कटाई के पूरा होने के कम से कम एक महीने बाद प्रकाशित किया जाता है, इसलिए अंतिम अनुमान के समय तक फसल की कीमतें तैयार की जा सकती हैं।
